

Industrial Temperature

DDR3 SO-DIMM

Built of high-quality DDR3 chips and extra-durable components, Transcend's Industrial Grade SO-DIMM is an ideal choice for space-constrained applications that require rugged durability and flawless stable operation even in extreme heat or cold environments. Rugged notebooks, POS terminals, indoor/outdoor kiosks and vending machines, medical equipment, and other industrial systems will benefit from the robust durability of Transcend's Industrial Grade memory modules, which are built with PCB contact pins that are 10 times thicker than normal. With industrial range (-40° to 85°C) operating temperature flexibility, these memory modules are specially engineered to maintain optimum performance.

Features

- JEDEC standard $1.5V \pm 0.075V$ power supply
- 8 bit pre-fetch
- Burst Length: 4, 8
- Bi-directional differential data-strobe
- Internal calibration through ZQ pin
- On-die termination with ODT pin
- Serial presence detect with EEPROM
- Gold plating of PCB gold finger is 30u
- Industrial grade capacitors ensure voltage stability
- 100% tested for stability, compatibility and performance

Module Type

667/800MHz for 1333/1600Mb/s/Pin

Number of Rank(s)	1 rank/ 2 ranks
Number of Pin(s)	204 pin
Capacity	1GB / 2GB / 4GB / 8GB
DRAM Configuration	128Mx8 / 256Mx8 / 512Mx8
Timing Description	9-9-9 / 11-11-11
Voltage	1.5V
PCB Height	1.18 inches
Operating Temperature	-40°C ≤ Ta ≤ 85°C Note: Operating temperature is the ambient temperature (Ta)
Warranty	Limited Lifetime Warranty* *Please access here for more information about Transcend Warranty Policy.

Due to the complexity and variety of industrial applications, Transcend cannot guarantee 100% compatibility with all platforms and under all scenarios.

For special applications and environments, it is strongly suggested to contact Transcend beforehand for clarification.
